

## FLU CLINIC INFORMATION

The Collier County Health Department holds Adult Flu and Pneumonia Vaccine Clinics at various community sites from mid-October until mid-January each year. The clinic dates, times and locations will be posted on this website in early October once the dates have been established. This information will also be available on our hotline:

**(239) 252-8212.** The cost of the flu shot is \$30. The cost of the pneumonia shot is \$40. For those with Medicare **Part B**, we are able to bill Medicare directly. For all other forms of insurance, the fee is collected at the time of service; and the client is responsible for submission to insurance.

From mid-January through May, flu and pneumonia shots are available on a limited, appointment-only basis at the Collier County Health Department for those still needing to be immunized. Appointments will be taken after the conclusion of our community clinics in January by calling the Flu and Pneumonia Coordinator at (239) 252-8203.
